PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on internship experience in React.js and a strong track record of building full-stack and AI-powered applications end to end. Proficient in Python, JavaScript, React.js, FastAPI, and Express.js, with practical experience in REST API development, machine learning, and computer vision. Collaborative team member comfortable working across the stack, from responsive user interfaces to backend services and model integration. Focused on shipping reliable, well-tested software and applying AI to solve real-world problems.

EDUCATION

PSG College of Technology, Coimbatore **2022 – 2026**
Bachelor of Engineering – Computer Science and Engineering

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Frontend: React.js, React Native, HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB, Firebase, Supabase
AI / ML: PyTorch, TensorFlow, Scikit-learn, OpenCV, LangChain, FaceNet, CLIP, BLIP, Grounding DINO, TIFA, PaddleOCR
Tools: Git, GitHub, Docker, GitLab CI/CD, Postman

EXPERIENCE

Software Engineer Intern – SAS Techno Solutions **Jun 2026 – Aug 2026**

- Developed responsive frontend components using React.js for enterprise web applications, collaborating with a team of developers across multiple sprints.
- Integrated frontend applications with REST APIs, implementing data fetching and CRUD functionality for seamless user interactions.
- Debugged UI issues and improved application responsiveness across devices and screen sizes.
- Used Git for version control and participated in code reviews to maintain code quality and ship features on schedule.

PROJECTS

ISearch – AI-Based Face Recognition System [GitHub]

- Developed an AI-powered criminal identification system using FaceNet, FastAPI, and Firebase Authentication for secure user management.
- Built a Flutter application capable of real-time face recognition across a dataset of over 68,000 images, achieving approximately 94% identification accuracy.
- Reduced manual criminal identification effort by approximately 80% through automated facial recognition and real-time search.

  Tech Stack: Flutter, FastAPI, Firebase Authentication, FaceNet, OpenCV, Python

FIN-AI – AI-Powered Personal Finance Platform [GitHub]

- Built a full-stack personal finance platform (as part of a 2-person team) enabling users to track expenses, manage budgets, and visualize financial insights.
- Developed REST APIs using Express.js, implemented Firebase Authentication, and integrated an AI service powered by LangChain for intelligent financial assistance.
- Reduced manual financial analysis by approximately 70% through AI-powered spending insights and automated recommendations.

  Tech Stack: React.js, Express.js, LangChain, Supabase, Firebase

VisionAlign – Text-Image Semantic Consistency Checker [GitHub]

- Developed a multimodal AI system to evaluate semantic consistency between text prompts and generated images.
- Integrated CLIP, BLIP, Grounding DINO, TIFA, and PaddleOCR into a unified FastAPI pipeline with a React.js interface for automated evaluation.
- Achieved approximately 90% semantic consistency evaluation reliability using bidirectional forward and backward semantic scoring.

  Tech Stack: React.js, FastAPI, Python, CLIP, BLIP, Grounding DINO, TIFA, PaddleOCR

Camera Kaaval – Traffic Issue Reporting Application [GitHub]

- Developed a cross-platform mobile application (as part of a 2-person team) for reporting traffic violations and road infrastructure issues using React Native.
- Implemented image upload, location-based reporting, and REST API integration with a MongoDB backend.
- Reduced complaint submission time by approximately 60% through digital reporting and centralized issue management.

  Tech Stack: React Native, Expo, Express.js, MongoDB
